GLADIOLUS

FEB 2 1931 *

The Gladiolus descriptions in this price list are necessarily brief. Large bulbs are from one inch in diameter to larger sizes; "M", medium bulbs range from strong half inch to nearly one inch. "S", small bulbs are one-half inch and smaller. We offer six bulb sizes, and a large variety for the price of five. The "S" size are offered 100 for the price of 60. We prepay postage on all orders. We ask that customers send cash in the form of check, money order or stamps with their order. Should any of our goods prove unsatisfactory we will appreciate an opportunity to make proper adjustment. If properly grown every "L" and "M" bulb should bloom this year; and many of the smaller ones should bloom. The soil and the care given them will have much to do with their flowering. Every small bulb that does not bloom should grow into a fine large bulb and produce considerable number of bulbets. Planting instructions will be sent with every order. Please make orders for at least one dollar and no items less than ten cents. If orders include items under ten cents we will send those items not labeled.

For every \$2.50 sent for Gladiolus we will allow 50 cents extra, your selection, that is \$3.00 for \$2.50.

We believe every purchaser will be delighted with the bargain when the blooming season comes. The bulbs will range in size from 4's to 5's and 6's. Every one of the 4's and 5's and many of the 6's should bloom this summer. These bulbs are good cut flower varieties mixed and are not labeled. Those who do not care particularly for named varieties labeled should avail themselves of this offer and buy their bulbs for about one-fifth what these same bulbs would cost them if labeled. The 1,000 bulblets are 100 each of 10 good varieties correctly labeled. It is not possible to give now the names of the varieties because the orders will be filled from those varieties of which we have the largest quantities. At present we would likely send Giant Nymph, Souvenir, 1910 Rose, Francis King, Alice Tiplady, etc.
